About Mindset by Carol Dweck

No two people think alike. Some of us are optimists by nature; others are pessimists. Some are unfailingly happy and outgoing, while others may seem depressed and shy. Philosophers, Psychiatrists, Psychologists and a wide range of scientists have been working for centuries to shed light on why we are 'the way we are.'

In modern times, Dr. Carol Dweck is one of the most influential scientific minds when it comes to human thought. Her work over many decades has led to what she calls "mindset theory" - that all people have either fixed mindset, or a growth mindset. The book, Mindset by Carol S. Dweck, explores what it means to have either a fixed or growth mindset; how your mindset affects your work, relationships and success in general; whether organizations can also said to have mindsets; and how you can change your mindset if you don't like your current one.
