- Global warming is dangerous.
- Carbon dioxide is driving our dangerous global warming.
- We urgently need to cool down the planet.
- Carbon dioxide is a dangerous pollutant.
- The future looks bleak unless we drastically reduce our "carbon footprint."

This slender volume sets the record straight on all of the above issues.

There are concerns for the future, but none of these are it. And when we have real problems to face, it does no good to be fixing things that don't need it.
