The fact that we often hum to ourselves, to family members, or to close friends suggests that humming is a personal, intimate act. It can also be a powerful way in which people open up to others and share collective memories. In religious settings such as Tibetan chanting, humming offers a mesmerising sonic experience. Then there are hums that resound regardless of human activity, such as the hums of impersonal objects and man-made or natural phenomena.

The first sound studies book to explore the topic of humming, *Humming* offers a unique examination of the polarising categories of hums, from hums that are performed only to oneself, that are exercised in religious practice, that claim healing, and that resonate with our bodies, to hums that can drive people to madness, that emanate from cities and towns, and that resound in the universe. By acknowledging the quirkiness of hums within the established discourse in sound

studies, *Humming* takes a truly interdisciplinary view on this familiar yet less-trodden sonic concept in sound studies.
