Today, *Personal Knowledge* remains one of the most significant philosophy of science books of the twentieth century, bringing the crucial concepts of “tacit knowledge” and “personal knowledge” to the forefront of inquiry.

In this remarkable treatise, Polanyi attests that our personal experiences and ways of sharing knowledge have a profound effect on scientific discovery. He argues against the idea of the wholly dispassionate researcher, pointing out that even in the strictest of sciences, *knowing* is still an art, and that personal commitment and passion are logically necessary parts of research. In our technological age where fact is split from value and science from humanity, Polanyi’s work continues to advocate for the innate curiosity and scientific

leaps of faith that drive our most dazzling ingenuity.

For this expanded edition, Polanyi scholar Mary Jo Nye set the philosopher-scientist’s work into contemporary context, offering fresh insights and providing a helpful guide to critical terms in the work. Used in fields as diverse as religious studies, chemistry, economics, and anthropology, Polanyi’s view of knowledge creation is just as relevant to intellectual endeavors today as when it first made waves more than fifty years ago.
