Why do we believe that parenthood is the ultimate road to fulfillment in life? In *The Baby Matrix: Why Freeing Our Minds From Outmoded Thinking About Parenthood & Reproduction Will Create a Better World*, author Laura Carroll answers these questions and more through an exploration of and critical look at the pervasiveness of "pronatalism" - the belief that having children should be the central focus of every adult's life.

Carroll examines the historical origins of pronatalism, the reasons why it has such a deep hold on societies even though most people remain unaware of it, and whether it makes sense - for individuals or for the world as a whole. She shows the ways in which pronatalism is perpetuated, scrutinizes seven major pronatalist assumptions that lead people to accept them without question, and offers alternative

assumptions that reflect realities, true reproductive freedom and responsibility in today's society. Whether you are already a parent, want to be a parent, or don't want children, you will never think about parenthood in the same way.

Investigating what few have had the courage to discuss, *The Baby Matrix* examines the negative effects of pronatalist beliefs, including how they dictate the "normal path" to adulthood, put unwarranted pressure on people to have biological children, and fail to foster a society in which those who are best suited to become parents are the ones who have children.

Carroll also brings to light the impact that pronatalism has had on the world at large and will continue to have if its ubiquitous influence is not challenged. Citing compelling statistics, she shows how our belief that we can have as many children as we want is a serious threat in a world with finite resources. In the process, she brings into focus how every life brought into the world directly affects our survival.

This manifesto makes the case for why it's time for all of us to understand why we can no longer afford to leave pronatalist assumptions unquestioned. Without compromise, *The Baby Matrix* is a reality check for us all. Are we willing to hold on to beliefs that aren't necessarily true ... even to our detriment? This book will make you examine your own intentions and beliefs, will rile you, and might just change your mind.

The Baby Matrix is a must-read for anyone interested in psychology, sociology, anthropology, parenting issues, environmentalism, and social justice. But most of all, it's for anyone, parent or not, who reveres the truth and wants the best for themselves, their families, and our world.
